PROFESSIONAL EXPERIENCE

Growth & Product Specialist | Mahattaart

Jan 2024 – Present · New Delhi

- **Product Discovery Journey:** designed the product discovery flow and trigger logic to show results first, then progressively capture user preferences (space, size, style, colour, reference images) for relevant, personalized recommendations.
- **Pricing Logic & Business Rules:** identified gaps in the existing pricing model and defined a rule-based pricing flow covering material specifications, consumption, and wastage, translating business rules into implementation requirements.
- **PRDs & Agile Delivery:** write requirements, user stories and acceptance criteria; run backlog and sprints in Jira, assign engineering work, and track dependencies, timelines and stakeholders to launch.
- **Product Analytics & Experimentation:** use SQL to extract product and business data, compare it with GA4, analyse patterns and discrepancies, form hypotheses, and evaluate UI/UX versions through A/B tests.
- **Tracking & AI Automation:** define tracking requirements with GA4/GTM/DataLayer across listing, customization and checkout journeys, and built AI-assisted workflows that improved team productivity by **about 15%**.

Product Catalog Specialist | VLE Bazaar

Sep 2023 – Dec 2023 · New Delhi

- Managed product catalog operations across Amazon and Flipkart, contributing to **about 11% organic traffic growth** and **8% conversion improvement** through catalog and search-visibility work.

Customer Product Experience Executive | HoMafy

Jan 2022 – Aug 2023 · New Delhi

- Gathered customer product usage feedback and translated it into catalog, content and listing improvements, while managing e-commerce product operations — contributing to **about 9% sales growth**.

SELECTED PRODUCT WORK

Progressive Product Discovery *(Product)* — Designed a progressive discovery journey that keeps browsing active while capturing user signals gradually through contextual triggers and refinement logic.

Rule-Based Pricing Flow *(Product)* — Defined pricing logic around material specifications, consumption, and wastage to translate complex business rules into a clear, implementable product flow.

Product Analytics & Experimentation *(Product Analytics)* — Combined SQL and GA4 data to investigate user behaviour, form hypotheses, and evaluate UI/UX changes through measurable product signals.

Product Delivery & Agile Execution *(Product)* — Managed Jira backlog and sprint execution, assigned work to developers, tracked dependencies and timelines, and coordinated product changes through implementation and validation.

TECHNICAL PRODUCT WORK

- **GA4 / GTM / DataLayer:** Worked on product tracking across wallpaper homepage, listing, PDP, search, customization, checkout and purchase journeys, including events for filters, mockup changes, wall-size input, preview generation, pricing updates and purchase.
- **Full-Stack Prototyping:** Build and deploy working products end-to-end (frontend, backend, APIs) using vibe coding, hosted on Render and Netlify, including independent SaaS-style products.
